EDUCATION

Academlo

SCHOOL OF TECHNOLOGY AND COMPUTER SCIENCE

BACK-END Development with **Node.js** in javascript [Award](#)

feb-2023

Academlo

SCHOOL OF TECHNOLOGY AND COMPUTER SCIENCE

Front-End Development with **React** [Award](#) and **javascript** [Award](#)

Sep 2022

National Autonomous University of Mexico (UNAM)

Electrical and Electronic Engineer [Award](#)

Award on december 2015

GPA 3.35

MAIN PROJECTS

SatoryTech S.A C.V remote work Software Developer

15- February 2023

Developer with **Vue.js** Vuetify and Bootstrap like edit style for edit, backend with **Laravel** and to work with SCRUM for communicating daily.

Post a event in your city API Next.js

20- December 2022

We create API for event of your city, with the point to learn new technologies and work for team, you could post a event and create user and vote for your event favorite use technologies like: **useSWR**(hook for use for Api`s), use the **sweetalert**, use the **tailwin** for edit your page, and use the **whiper** for use the touch slider.

Diagram: <https://dbdiagram.io/d/639bd8bf99cb1f3b55a1bffc>

Poké API React.js

- You can find a pokemon with a name or id number or skill ability with input control.
- I use some **hooks**(**useState**, **useEffect**, **useRef**, **useCallback** and **useContext**), global variables(**redux**), control inputs all the time and use promises with **axios**, and the use of **React Router** to change the page and protected route.

Demo: <https://effervescent-faloodah-042c84.netlify.app/>

Github: <https://github.com/flaviovidalhuax/lastpokeapi>

Weather API React.js

26-September 2022

This API to find data about the weather and show in real time your place that you live.

- In this code use the **Hooks**(**useState**, **useEffect**), use the **axios**(then and catch).

Github: <https://github.com/flaviovidalhuax/weather>

Skeleton for backend-node.js

26-enero 2023

This is my skeleton for reducing work when you init a new project, it is base the code in the backend and deploy in Render.

Demo deploy: <https://esqueleton-email.onrender.com>

Documentation in **swagger**: <https://esqueleton-email.onrender.com/api/v1/docs/>

Code: <https://github.com/flaviovidalhuax/squeton-email>

SKILLS

1 year: JavaScript,
1 year: React (npm create vite@latest)
1 year: HTML
1 year: CSS
1 year: Node.js
1 year: SQL postgres
5 month: Next.js
3 month: Vue.js Vuefity
3 month: larabel (php)
